

Rampiva Brainspace Connector

Our Brainspace Connector accelerates the load of Nuix items to a Brainspace Dataset, and then notifies SMEs when the Brainspace Build is complete and material is ready for review. You can integrate Brainspace analytics and review as part of a Rampiva Workflow from legal hold to review.

Specific Features

- Build Brainspace Dataset from Nuix Case Items
- Load 2 million Nuix Items into Brainspace in under an hour
- Eliminate Latency when starting the Brainspace Build – day or night
- Auto-mapping fields from Nuix to Brainspace
- Configurable truncation of very long text for simplified upload, with auditing
- Monitor the Build progress and send a notification when it completes
- Query Brainspace and directly update metadata for Nuix Items
- Retrieve Brainspace Classifier results as numerical values, compatible with range searches

Licensing

Load and Build functionality available in Rampiva Automate - Business Edition and the retrieval of items to Nuix and the management of Datasets available in Rampiva Automate - Premium Edition.

Who is it right for?

Anyone who has Nuix and Brainspace platforms will want to leverage the Rampiva Connector to simplify and accelerate the creation of a Brainspace database from a Nuix Case. High-Frequency Users will benefit from the metadata and tag retrieval to Nuix capabilities available in Premium Edition.
