

Rampiva Automate - Corporate Edition

Realize accelerated response times with Legal Hold Notifications where custodians can self-upload relevant data, or trigger enterprise collections based on their responses. Build an end-to-end workflow where custodian data is automatically processed as soon as it's available without additional user interaction, and even send select items for immediate review. Help your team focus more on facts and patterns and less on staging, documentation and oversight.

Build on Rampiva Automate - Premium Edition by adding:

Legal Hold Notification

Notify custodians of Legal Holds, track their acknowledgements and responses to surveys.

Custodians Self-Upload

Allow custodians to upload files directly to Rampiva as part of their responses to Legal Holds for automatic processing.

Reminders and Escalation

Define automatic reminders and escalations to ensure all custodians provide responses to Legal Hold surveys within the required timeframe.

Customizable Templates

Use the built-in notification templates or design custom templates for hold, release, surveys, reminders and escalation notifications.

Live Chat

Allow custodians to interact with Legal Hold administrators using a live chat to get clarification on the scope and guidance on how to respond to surveys.

Single-Sign On

Enable custodians to access and respond to surveys directly by integrating authentication with Microsoft, Google or OKTA, or by providing them with single-sign on links by email.

Nuix ECC Automation

Templatize, run and monitor collections from a unified platform, for accelerated response time.

Just-in-time Agent Deployment

Deploy Nuix ECC agents to the specific computers that need to be collected at the time of the collection.

Unified Administration

See all activity in a single product, making it easy to train on, adopt, monitor and maximize productivity.

Integrated Workstream

Seamlessly link Hold Notifications with Collections, Processing, and promote-to-Review for a single end-to-end workstream.

Seamless Dashboards

Include Legal Hold and Collections in your Rampiva Dashboards to gain visibility on all aspects of the Holds and Collections.

Who is “Corporate Edition” right for?

Rampiva Automate - Corporate Edition is designed for internal teams at major corporations, law firms and service providers. It completes the loop, helping teams get from Hold notifications and into Review as fast as possible. It's a great product for corporate eDiscovery teams, particularly those who are also using Nuix Enterprise Collection Center and/or Nuix Investigate.

Implementation

All Rampiva Automate Editions are designed to be lightweight and easy to install. They do not require new hardware beyond the environment that supports your Nuix Environment. To learn more about training or advanced implementation packages, click here:

About Rampiva

Rampiva is a global software provider focused on data automation, system administration and analytics. Established in 2016, Rampiva clients run over 1,100 Nuix Workers in 8 different countries, processing more than 1 PB of data for eDiscovery, digital investigations, and other projects each year.
